Jabiru J400 Door Bolts				

SERVICE BULLETIN: JSB 003-1

Issue: 1

Date: 11th Oct 2004

Subject: Jabiru J400/J200 Door Bolts

1. Applicability:

Jabiru J400, J200, J430, J230, J450 and J250 models

2. Background:

Some Builders of Jabiru J200/J400 series aircraft (All Jabiru Fuselages with 3 doors) have found that the bolts attaching the doors to the hinges are too short to positively engage the threads tapped in the aluminium hinges.

3. Recommendations:

During the aircraft's next inspection, the hinges should be visually inspected. Refer to Figure 1 below.

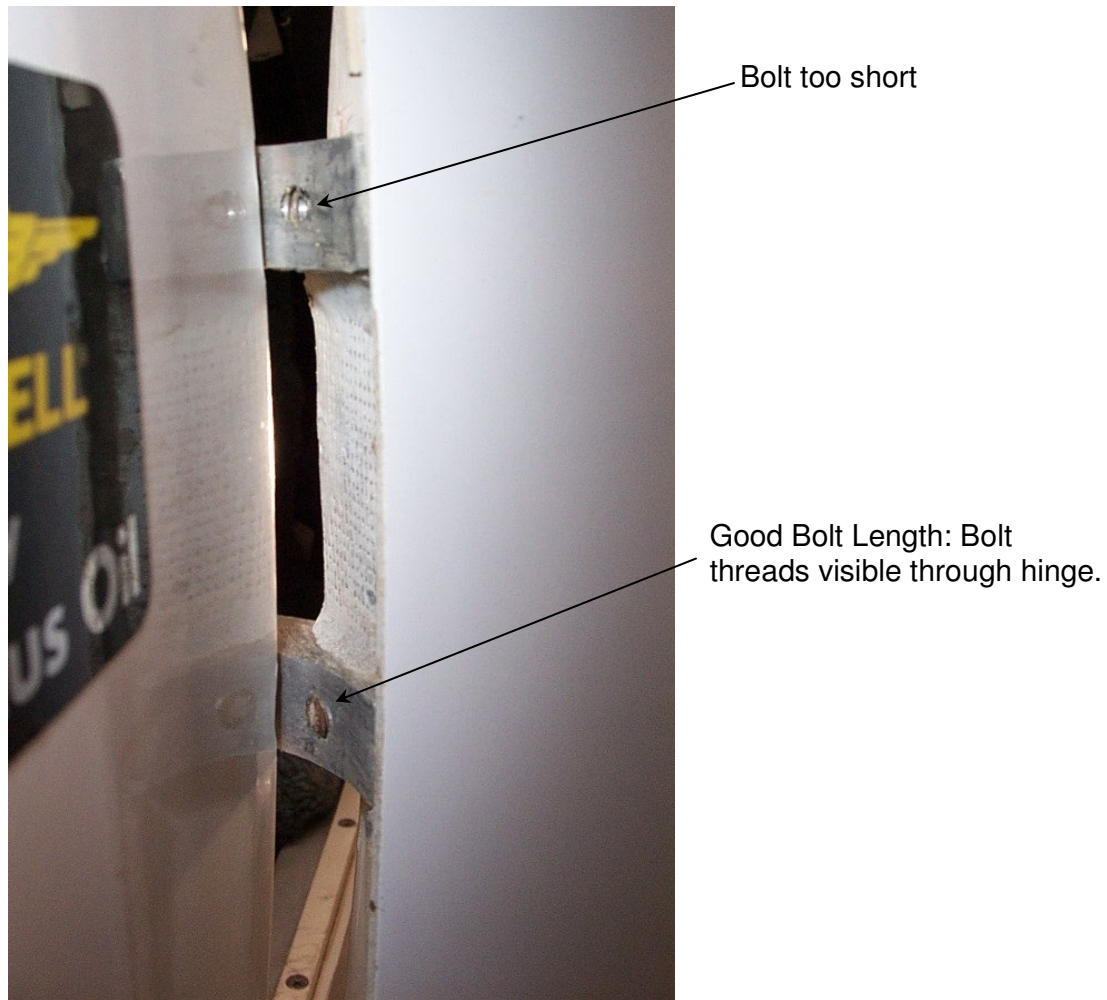

Figure 1. Hinge Bolt Detail

If one or more of the attachment bolts are short, as shown in the top bolt above, they are to be replaced with a longer item. The attachment bolts are 1/4" UNC Socket Head Cap screws.
