ULTRALIGHT AIRCRAFT INFORMATIONAL NOTICE

INFORMATIONAL NOTICE IDENTIFICATION NUMBER : 310107-1

Evektor Sportstar

To: All owners and operators of Evektor Sportstar aircraft utilising integral wing tanks.

Reason: Reviewed structural analysis and testing of the Evektor Sportstar has determined that the MTOW can be increased to 575kg from a previous 550kg limit. The aircraft continues to comply with the ASTM standard F-2245-06 for Light Sport Aircraft. The aircraft utilising the increased MTOW has been designated 'Sportstar Plus'.

Action: Contact the importer for further information on compliance documentation necessary to complete the action. Updated flight and maintenance manuals will be required.

Compliance: This information is currently only available to aircraft registered under the LSA system. Aircraft registered under CAO 95.55 para 1.6 & 1.7 remain unchanged and cannot make use of the increase in MTOW.

Further Action: All and any defects found when operating at a higher MTOW are to be reported to the RA-Aus office.

(Sportstar Informative Bulletin SPORTSTAR-006b refers. Contact the RA-Aus office for a copy if required)

Technical Manager

Defect Reporting is one of the primary ways we have in ensuring continued safety in our operations.
